

BYPASS ADAPTER

This accessory allows the use of a bypass filter system without turning off the system or dismantling the filter. Thus, a continuous operation of the filter system can be realized. The system as well as the hydraulic oil are protected by a GIEBEL Adsorber®. The bypass adapter is available with one or two bypasses, depending on the requirements of the plant. In addition, two different hole circles and thread connections are available: LK 41,3mm and LK 73mm DIN 24557.

VERSION	CONNECTION	CONNECTION BYPASS	SIZE A [mm]	SIZE B [mm]	SIZE C [mm]	NUMBER BYPASSES
F-LK41,3-MA_2-Bypass	LK 41,3 mm	G 3/8"	110	41,3	65	2
