

ACCESSORIES

ELBOW CONNECTION

The elbow connection is used for mounting an adsorber on horizontal barrels. Thus, a high degree of functionality and a space-saving use are realized. Elbow connections are available for all barrel designs and can be used for many other plants. By the locknut of the elbow connection for vertical mounting of an adsorber can be aligned.

VERSION	CONNECTION	USE	SIZE A [mm]	SIZE B [mm]	SIZE C [mm]
