

ACCESSORIES

VENTILATION SYSTEM

Through the use of a ventilation system pressure can be successfully avoided in the system. Applies this venting system, for example, in use for tank systems without vapor return. Optimal use in combination with a GIEBEL Adsorber®.

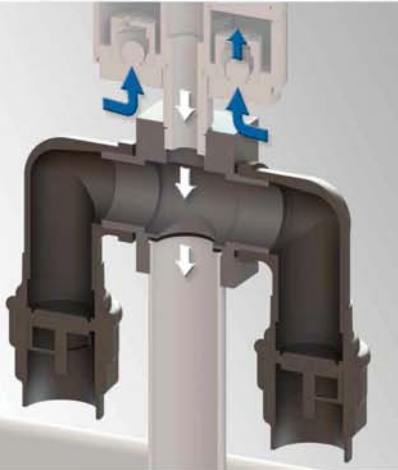

Pressure difference

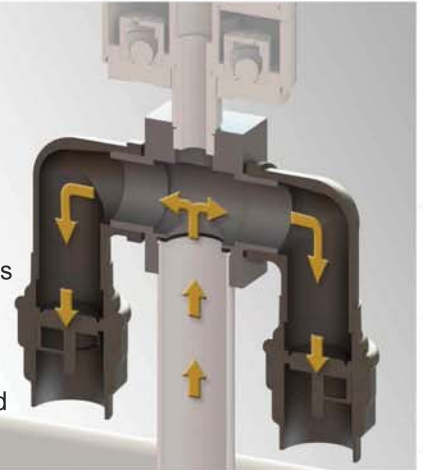

SUPPLY AIR

- Air flows through the adsorber evenly
- Air flows without pressure difference into the system

EXHAUST AIR

- The pressure generated when filling the tank escapes from 30mbar on
- Ventilation system protects the system against overpressure
- There is no vapor return of the tank system needed

VERSION	CONNECTION	VALVES	SIZE A [mm]	SIZE B [mm]	SIZE C [mm]
EB-1	Various thread	2 x 2"-Valves	240	100	290
EB-3	Various thread	1 x 1"-Valve	100	80	190
